Stainless Steel Shim Stock

Stainless Steel Shim stock is supplied in rolls from 0.001" to 0.080" (0.025 mm to 2 mm) thick, in 6" x 50" and 12" x 50" sizes. Unlike ordinary carbon steel, stainless steel does not spot, rust or corrode easily, so the shim keeps its thickness and finish in humid, wet and outdoor conditions. Maintenance and fabrication teams cut it to size for machine alignment, spacing and levelling.

TECHNICAL DATA

Material	Stainless steel
Form	Shim stock roll
Thickness range	0.001" to 0.080" (0.025 mm to 2 mm)
Sizes	6" x 50" and 12" x 50"

Typical values for guidance only, not for specification. Confirm grade, tolerances and dimensions with our sales team before ordering.

KEY FEATURES

- Thickness range 0.001" to 0.080" (0.025 mm to 2 mm)
- Roll sizes 6" x 50" and 12" x 50"
- Stainless steel resists rust, spotting and corrosion
- Can be cut to the exact size needed on site

APPLICATIONS

- Machine and motor alignment
- Levelling and spacing between mating parts
- Taking up wear and clearances in assemblies
- General maintenance, fabrication and tool rooms
